Days and periods	Intensive	Class s	style	Lecture	e			Language of instruction	English
[Overview and purpose of the course]									
One of the primary objectives of this course is to introduce students to the principles of sociology in general and key concepts of rural sociology in particular. In addition, we want to provide the analytical tools for understanding the processes inherent to these concepts. Beyond that, the course aims at enhancing students ' ability to identify different research perspectives and to critically discuss and analyze research strategies and methods. The approach will generally be a sociological analysis of the transformation of postmodern societies. This development is forced by demographic, economic and social change. Nowadays we observe a differentiation									
and polarization of rural wellbeing and lifestyle in Europe, the US and Japan. Therefore the theoretical and empirical focus lies on transformation theories, social inequality in general and territorial inequality in special. [Course objectives] As an introduction to rural sociology, this course is designed to give an overview of the sociological concepts of "rurality", "demographic change", "socioeconomic developments and social problems in rural areas "; "repeasantization" (deprivation, rural poverty). We will discuss gender inequality, the future of rural landscape and societies. Lectures outline each of these issues and position them within the context of									
sociology. We will use seminars to debate key questions raised during lectures and to discuss selected issues based on academic publications.									
[Course schedule and contents]									
Lecture 1) Introduction: Images of Farming, (Rural) Sociology									
Lecture 2) Knowing Your Place: Rural Identity and Cultural Hierarchy
